

Byheir Wise

OBJECTIVE

Results-driven Software Engineer with over six years of experience in designing, developing, and optimizing web applications. Skilled in **C#, .NET frameworks, JavaScript, SQL Server, and Power BI**, with a strong focus on automation, process optimization, and data visualization. Adept at leading cross-functional projects, transitioning legacy systems, and ensuring compliance with industry regulations. Passionate about solving complex technical challenges, improving operational efficiency, and maintaining high-quality code standards in fast-paced development environments.

EXPERIENCE

June 2017 – March 2018

Collector | **SLM Corporation (Sallie Mae Bank)**

April 2018 – Present

Engineer | **SLM Corporation (Sallie Mae Bank)**

Developed and maintained applications using **C# in Visual Studio**, integrating with **.NET frameworks** to enhance performance and functionality. Successfully led cross-functional projects to transition **legacy systems** into modern platforms, improving operational efficiency and scalability. Proficient in utilizing **Power BI for data visualization, Snowflake for efficient querying, and SAS for automating tasks to drive efficiency**, while also creating and implementing tools that **streamline processes**, enhance user experience, and ensure compliance with **industry regulations**. Passionate about **code fixing**, serving as the lead developer in addressing **bugs, vulnerabilities, code smells, and duplications** to maintain high-quality code standards. Possesses a deep understanding of **business needs** and has a proven ability to deliver **high-quality solutions** that drive business growth. Thrives in environments that require **strong technical skills, meticulous attention to detail**, and a dedication to **continuous learning and development**.

EDUCATION

Wilmington University | Wilmington, DE

Bachelor's degree in business management

KEY SKILLS

- **Front End Development:** Proficient in **HTML, CSS, JavaScript, .NET frameworks, and C# development in Visual Studio**. Extensive experience in building **responsive, user-friendly interfaces** and optimizing web applications for **performance and scalability**.
- **Database Management:** Expertise in **SQL Server and Snowflake**, including **designing, managing, and querying databases efficiently**.
- **Power BI & Data Visualization:** Experienced in using **Power BI** to create **interactive dashboards and reports** that enhance **data-driven decision-making**.
- **SAS & Automation:** Proficient in using **SAS** to **automate routine tasks**, increasing efficiency and reducing manual effort.
- **Compliance & Risk Management:** Strong understanding of **regulatory requirements** and experience in developing **DCR-approved tools** that ensure **data integrity and compliance** with federal regulations.
- **Process Optimization:** Proven track record in **automating manual processes** and **reducing operational costs** through the implementation of **efficient tools and systems**.

- **Code Fixing & Quality Assurance:** Passionate about **maintaining code quality**, serving as the **lead developer responsible for fixing bugs, addressing vulnerabilities, resolving code smells, and eliminating code duplications**.
 - **Cloud & DevOps:** Experienced in **Git version control** and repository management within **Azure DevOps**. Understanding of **CI/CD pipelines in Azure DevOps** and their role in software deployment.
 - **Software Architecture & MVC Framework:** Experience with **ASP.NET MVC** for **building scalable web applications** and enhancing **code structure and maintainability**.
-
